Nicole Chaske	
---------------	--

Join Cassie, the first female hockey player inducted into Canada’s Sports Hall of Fame, as she shares her inspiring journey from viewing governance as her least favorite subject to embracing it as her greatest passion. In this candid session, Cassie reflects on her experiences as a board member, revealing the challenges she faced and the personal growth that followed.

Key Takeaways:

- **Embrace Humility:** Discover why leaving your ego at the door is essential for effective governance and collaboration.
- **Transparent Communication:** Learn the importance of open dialogue among board members to achieve shared objectives.
- **Proactive Engagement:** Understand how acknowledging biases and taking initiative can transform negative situations into opportunities for positive change.

Cassie Campbell Pascall

Cassie Campbell-Pascall is one of the greatest hockey players in Canadian history. During her 16-year career, she rewrote history and created a pathway for women in sport.

A career started with two unsuccessful attempts at being selected to join Team Canada in 1990 and 1992, Cassie fought through adversity to earn her way on the team in 1994. She went on to become one of Canada’s most decorated hockey players of all-time, winning three gold medals and capturing eight World Championships.

Following retirement, Cassie joined Hockey Night in Canada’s broadcast team and was quickly called up to become the first woman to do colour commentary on Hockey Night in Canada.

Covering commentary for three Olympic Games, Cassie is currently an analyst for ESPN and a Special Advisor for the PWHL.

Her breakaway into sport media & creating opportunities to advance the women’s game is the next phase for the trailblazer to stamp her legacy in hockey.

A1 - The role of trustees in fostering safe and healthy work and learning environments

March 20

10:30AM - 11:45AM

2E - RBC
Convention Centre

“Education liberates the intellect, unlocks the imagination and is fundamental for self-respect. It is the key to prosperity and opens a world of opportunities, making it possible for each of us to contribute to a progressive, healthy society.” ~United Nations Across the country education leaders are realizing that fostering wellbeing in our schools and school systems is the key to unlocking the transformational power of public education.

Students learn best when they are well. When staff are well, they can do their best work. While the benefits are clear, the path towards fostering wellbeing in K-12 education is complex. In this interactive session we will:

- Examine pan-Canadian trends that are affecting the wellbeing of students and staff in our school divisions,
- Explore the connections between student and staff wellbeing, and consider how these relate to the goals of our education system,
- Appreciate how actions to create healthier work environments can help attract and retain staff,
- Identify actions that school board trustees can take to foster healthier work and learning environments within their school division and across the province.

Kathleen lane	
<p>Kathleen is the Executive Director for the EdCan Network, where she previously served as the Program Director for Well at Work. As the Executive Director Kathleen provides strategic leadership to the organization, leading the program management and partnership development. She is particularly interested in creating ecosystems where people can flourish and the role of K-12 education in creating a better future for all.</p> <p>Kathleen studied population health before earning her Master of Business Administration from the University of British Columbia. She managed two cross-campus research projects to understand how the learning environment affects student mental health and wellbeing. Focused on bridging the theory-to-practice gap, Kathleen presented findings from her research into teaching practices that support student learning and wellbeing at the International Conference for Health Promoting Universities and Colleges and developed instructor resources to support implementation of instructional practices that promote student wellbeing. Over the past several years her work has focused on building management and leadership capacity to support healthy and productive workplaces.</p>	

10:30AM - 11:45AM

2F - RBC
Convention Centre

The rapid rise and adoption of artificial intelligence (AI) is transforming the business and education landscape, offering unprecedented opportunities for efficiency and innovation. However, this technological advancement comes with significant risks and governance implications that organizations must navigate and may not completely understand.

As AI systems increasingly influence decision-making processes, your organization will face, or is already facing, challenges related to governance, data privacy, ethical considerations, and compliance with emerging regulations. Understanding these risks is crucial for school administration leaders and board members to ensure responsible AI use, protect organizational integrity, and harness the full potential of AI technologies while mitigating potential pitfalls.

Embracing a proactive approach to AI governance will not only safeguard organizations, but also foster trust among stakeholders in an era where AI is expected to become integral to operational success.

Andrew Behnke	
<p>Andrew is a Partner with KPMG and leads Risk Services, including Cybersecurity, in the Winnipeg and Manitoba market.</p> <p>Andrew is an experienced leader in Risk, Internal Audit and Information Security with a demonstrated history of working across industries. He is skilled in Risk Management, Information Technology Controls, Security, Accounting and Auditing. With the experiences he has gained through 25+ years he is able to translate IT and data risks into an integrated message that is meaningful from a business and governance perspective.</p>	

10:30AM - 11:45AM

2G - RBC
Convention Centre

This engaging and impactful workshop will explore essential strategies and insights to empower Manitoba School Boards to lead in climate action. Participants will gain valuable knowledge and practical tools to foster sustainability and environmental leadership within their schools.

Topics of Discussion:

- **Key Insights on Climate Change Education:** A deep dive into essential takeaways from the latest research on excellence in climate change education, helping school boards understand the most effective ways to engage students and staff.
- **The Importance of Climate Leadership and Climate Action Plans:** An exploration of why climate leadership is crucial for Manitoba School Boards, along with actionable strategies to implement climate action plans that make a difference at the local level.
- **Growing the Good: Climate Action in K-12 Schools:** A discussion on how schools can actively contribute to climate change education, with a focus on fostering an ethic of care and a culture of stewardship, amplifying student voices, and promoting collaborative community action to turn these efforts into lasting, hopeful change.

Heather Eckton	
<p>Heather Eckton has devoted over twenty years to public education and is an advocate for amplifying student voices. Currently, she serves as the Climate Action Divisional Teacher Team Leader in Seven Oaks School Division, supporting climate action across 28 K-12 schools.</p> <p>Heather is also an active member of Educators for Climate Action (eca) Manitoba, the UNESCO Associated Schools Project Network in Manitoba, and the founder of the Sustainable Living Academy Manitoba (SLAM). She is a SSHRC Doctoral Fellow at the University of Manitoba, where her research focuses on excellence in climate change education and transformational learning.</p>	
Will Burton	
<p>Will Burton is a lecturer in social and environmental methods courses for pre-service and in-service teachers in the Faculty of Education at the University of Winnipeg. He has a decade of experience in the Manitoba K-12 public education system including at the elementary and senior years, in traditional and alternative learning environments, as both a classroom teacher and principal-teacher.</p> <p>Will's current interest and scholarship focuses on place-based pedagogies, climate change education, and interdisciplinary approaches to the K-12 curriculum. Enrolled at Lakehead University's Ph.D in Educational Studies program, under the guidance of Dr. Ellen Field, his dissertation focuses on the design and facilitation of place-based pedagogies in the K-12 Manitoba education system.</p>	

10:30AM - 11:45AM

2H - RBC
Convention Centre

Succession planning helps to ensure that boards are prepared for board members to come and go from the board. Even outside of an election year, boards can do much to promote their work with members of the community. The more people see and understand the board's role in providing for the educational needs of the community's school-aged children, the more likely they will be to put themselves forward for election.

To help boards achieve that goal, the association launched a mentorship program (BC4F) in 2022 to recruit and support a more diverse array of candidates to run as candidates in school board elections held that year. Picking up on that theme in preparation for the 2026 elections, this session will provide guidance in general recruitment practices, involving your community, building relationships and running targeted campaigns.

Join us to get a head start on developing strategies to promote recruitment and succession planning to keep our school boards strong!

Josh Watt

Across a quarter century career in politics and policy at all levels of government, **Josh Watt** has served as Executive Director of MSBA for nearly a decade.

Having attended Carleton, Manitoba, Winnipeg and Harvard Universities, he is also a current Member of the Royal Canadian Legion, Vice-Chair of the Accessibility Advisory Council of Manitoba and the Alliance Française du Manitoba, and a public interest representative on the Continuing Competency Committee of the College of Registered Nurses of Manitoba. In 2021, he was named a Fellow of the Royal Society of Arts.

Jodie Taylor

Jodie Taylor is the acting Director, Governance and PD Services at MSBA. To this role she brings a wealth of leadership, policy and governance experience from over 18 years within the field of Human Resources. As someone who believes in growth and opportunities,

Jodie has worked in various roles and industries always focusing on developing others as well as herself. She has developed and lead numerous workshops, training sessions, mentorships and events helping others to expand their skills and networks.
